## Get Insights from Data Breach Investigations

**Ashish Thapar**

Managing Principal

Verizon Threat Research Advisory Center (VTRAC)

Verizon Enterprise Solutions

### ABSTRACT

Move beyond the fear, uncertainty and doubt surrounding the cyber incidents and threat landscape. Learn from the real cyber investigations, associated trends, common pitfalls and countermeasures.

### SPEAKER BIOGRAPHY

Ashish Thapar is the Managing Principal for Asia Pacific and Japan region in the VTRAC team at Verizon Enterprise Solutions. In this role he is responsible for all customer-facing cyber incident response, digital forensics, electronic discovery, and IT investigations. Prior to this role, Ashish was responsible for the business and portfolio management of Verizon's security professional services team in Asia. Ashish has a long history of serving countless high profile clients across multiple business verticals, assisting them with their cyber security strategy, governance risk & compliance, and threat & vulnerability management areas.

Ashish holds a number of global certifications such as CISSP, CISM, CISA, GCFA, CCSK and CDCP. In addition, he has also been an accredited PCI Qualified Security Assessor for several years.

Mr. Thapar has written several white papers/articles and has been an active speaker in several industry events/seminars including coverage on live TV programmes, radio interviews and podcasts on issues related to cyber security.
