

# Trustworthy Computing in the 21<sup>st</sup> Century

**Gary Lim**

Director, Education & Skills, Microsoft Singapore

## **ABSTRACT**

As the world continues to change and business requirements evolve, some things are consistent: the demand for security and privacy. Microsoft firmly believes that everyone deserves a trustworthy cloud experience and at Microsoft we are committed to delivering that experience in the cloud. The skills that are required to ensure a safe operating environment is also key. In this session, Microsoft will share the landscape and initiatives that are in place to help the community scale their knowledge of cybersecurity.

## **SPEAKER BIOGRAPHY**

As the Director for Education & Skills at Microsoft Singapore, Gary is responsible for helping to transform the education agenda for the 21st century through successful execution of a broad set of initiatives within Singapore and the region. He engages with Educators, Government Elites and Policy Leaders as their trusted advisor to ensure all stakeholders are provided with the latest in education technology to enhance learning environments and ensure a steady pool of future-ready individuals.

Gary also sits on various advisory boards where he contributes his time and insights with the primary focus on skills development in the infocomm sector. He continues to be responsible for security interactions with local Government elites as their trusted advisor for cloud security and adoption.

Overall, Gary plays a pivotal role in Microsoft's mission to empower educators to help students realize their full potential by providing real impact for better learning outcomes through Microsoft technology, programs and thought leadership.
