
Intelligent Threat & Risk Analytics coupled with Device Identification utilizing Device Scoring for enhanced Pre-emptive Threat Detection

Matthew Ainscow

Chief Executive Officer, Solus Connect

BIOGRAPHY

Matthew combines traditional entrepreneurial values with board level institutional expertise. Following a City career as a research analyst with AIM Distribution Trust, Matthew formed a partnership with Schneider Trading Associates LLP that established an in-house hedge fund that consistently outperformed the market.

Matthew is a hands-on, practical executive. He is passionate about providing the world with a safe, easy to use authentication solution like no other and Solus Connect success thus far is down to his formidable experience and determination.

As an investor and experienced investment professional, Matthew will always have his shareholders' interests at heart and is able to provide the leadership needed to grow the company to its ultimate goals.

Intelligent Threat & Risk Analytics coupled with Device Identification utilizing Device Scoring for enhanced Pre-emptive Threat Detection

Simplified analysis using:

- Dashboards and reporting, alerts, and custom rules
- Collect, store and analyse event data from a single log source
- Integrate expertise from Solus Connect security feeds

Improved detection by:

- Device based detection and user entity behavioral analytics
- Apply real-time threat intelligence to event streams

Accelerated investigation for:

- Faster forensics investigation and alert triage from context
- Augment security analysts by enhancing data feeds
